✓ **Set relay working mode (Only be set by SMS)**

Use SMS to set: `# 6 # 1 # NO # 2 # NC` (In this command "NO/NC" can be changed according to needs.)

Note: "1": main relay; "2": backup relay; "NO": relay normally open; "NC": relay normally closed; default is "NO".

✓ Set dialing status

1. Use the host to set: In the setting mode, press **4 #** or **5 #** **limited call time** **#**

Note: In the standby mode when a visitor presses the room number, the host calls the authorized phone number of this room number.

“4” indicate: Automatically hangs up after the first ring (default);

“5” indicate: When a visitor presses the room number, the host calls the authorized phone numbers of this room number till the other side hangs up. If answered, the host and the owner can have two-way communication.

When talking on a mobile phone, press # button on the phone, which can remotely open the door.

Limit the call time (if the call reaches the set time, the host will end the call). It can be set to 1~999 seconds.

Setting to 0 means no limiting time.

2. Use SMS to set: **#4** or **#5**

✓ Set relay closing time

1. Use the host to set: In the setting mode, press **6 #** **1 (or 2) #** **closing time** **#**

Note: “1”, “2” indicate respectively main relay and backup relay. Closing time can be set 1~300 seconds. Setting to 0 indicates no action. The default is 10 seconds.

2. Use SMS to set: **# 6 # 1 # time # 2 # time**

✓ Host status query

1. Use the host to query: In the setting mode, press **7 #**

Note: The host will reply the administrator’s number via SMS. The content is host IMEI code and GSM signal value.

2. Use SMS to query: **#7**

✓ Owner phone number authorizes family opening door password and phone numbers of family members

Use SMS to set (Owners' phone numbers should be used to edit the SMS and send to the host):

1) Set opening door password: `room number # 6 # password` (Password is 6 digits)

2) Set the phone number and opening door password of a single family member:

`room number # 2(or3,4,5) # phone number # 6 # password`

3) Set the phone numbers and opening door password of multiple family members:

`room number # 2 # phone number # 3 # phone number # 4 # phone number # 5 # phone number # 6 # password`

Note: If the administrator phone number is set as the owner phone number at the same time, it can not send SMS to authorize the family opening door password and family members' phone numbers. Therefore, it is not recommended to set the administrator phone number as the owner phone number.
